# Calcium Booster

**Complementary mineral  
feed for dairy cows**

CALCIUM BOOSTER is a complementary mineral feed for dairy cows, which provides rapid nutritional support when calcium and magnesium supplementation is required.

**INSTRUCTIONS FOR PROPER USE:**

Disperse 150g of the product in 500ml of lukewarm water (38°C), withdraw the preparation by means of a suitable syringe and then administer orally to the bovine concerned.

Repeat for the following days if necessary.

For a more effective use, always consult with a veterinary or nutritionist.

**COMPOSITION:**

Calcium chloride, Calcium gluconate, Calcium pidolate, Dextrose, Sorbitol, Anhydrous magnesium sulfate, Sucrose. Contains cereals and/or their related flours and/or sugar.
