CALVES AND SWINE

ReHidrata Frizz F2

**Complementary feed
for calves and swine**
Effervescent rehydrating agent

ReHidrata Frizz F2 is an effervescent oral rehydrating agent for calves and swine. It has an excellent appetibility, with a high energetic, rehydrating and probiotic action, thanks to its formulation, which is composed of electrolytes, highly digestible sugars, mineral salts, buffers, vitamins, probiotics, amino acids and trace elements.

ReHidrata Frizz F2 is indicated in all cases where there is a need to provide adequate support, restoring the animal's normal electrolyte balance when it suffers due to enteric disturbances, dehydration, hot stress, post-weaning, overcrowding and states of metabolic acidosis.

INSTRUCTIONS FOR PROPER USE:

Administer it to the animal by dissolving 100g of ReHidrata Frizz F2 in 1 or 2 litres of water, one or more times a day, as required, until the normal physiological conditions are completely restored.
